Skill	Years of experience
✓ Firebase4 years	4 years
✓ Flutter4 years	4 years

Additional skills:

Python 1 year	React Native 1 year	MySQL 2 years	
Go/Golang 1 year	MS SQL Server 2 years		
Android/Java 2 years	Android 4 years		
iOS Development 1 year	ERP 1 year	Inventory 1 year	
iOS - Swift 1 year	Node.js 4 years	Arduino 1 year	
Java 1 year	Windows 1 year	Cloud 3 years	
WebRTC 3 years	Go 2 years	SQL 1 year	React 2 years
Next.js 2 years			

Work History

Software engineer December 2020 - Present 2 yrs 5 mos

Vietnam Posts and Telecommunications Group (VNPT)

OTHERS
2021 - Now

VNPT GoMeet

<https://gomeet.vnpt.vn>

Vietnam's leading cloud-based online meeting service

Serving various audiences and sizes from organizations and businesses to education, health management and government, and local ministries.

- Mobile Application using Flutter with WebRTC and Mediasoup library
- Backend using Firebase to remote config services is available and a version that can be upgradeable

Cloud Flutter WebRTC Firebase

Mobile Dev August 2021 - Present 1 yrs 9 mos

Freelancer

Yoga, Fitness

I build a cross-platform mobile app with Flutter with backend completely using Firebase with tools: Functions, RemoteConfig, RealtimeDatabase, Firestore, FCM,...

Android, IOS, Flutter Aplication

Android Flutter Firebase

Nails CRM

A cross-platform mobile application developed in the Vietnamese nail shop management ecosystem in Germany. See more at <https://beewaving.de/landing-page>. Mobile applications are developed cross-platform Android iOS iPadOS and have many types of applications for store owners and individual users.

Technologies using:

- Flutter Remote Config for remote upgradable app version
- Firebase Cloud Message for push notifications on the app
- Firebase Analytics & Crashlytics to improve app quality.
 - Android on CHPlay
 - IOS on AppStore

Android Firebase Cloud Flutter

Gas Store Management App

The application has the following functions:

- Login / register an account
- View and select a list of gas cylinders
- Favorite gas cylinders are saved to my favorites
- Manage account information, shipping address, and payment account number
- Order and call hotline button

Android, IOS app build with Flutter

Flutter Android

Online Printing App

Application to manage printing directly on the phone:

- User registers an account and authenticates the account via email
- The user selects the document to print in the machine's memory, which supports scanning and cropping images. Supported file types: pdf, doc, docx.
- Users pay online through the GrabPay gateway
- After successful payment the user will receive the address and go to the store to receive the print
 - Android
 - IOS
 - Separately backend nodejs

Android Go Node.js

Mobile Developer May 2020 - December 2020 7 mos

K-GROUP VIET NAM - FIONA OFFICE

Catback - shopping with cashback and hunt for sale

Catback is an unlimited shopping and cashback platform, similar to other cashback apps, Catback has the strength of being able to link with brands from Tiki, Lazada, Sendo, and some brands. separately to bring thousands of promotions to users.

I work as a mobile specialist providing cross-platform apps to make shopping easier, with Flutter and Firebase

Flutter, Android, iOS, Firebase

Android Firebase Flutter

Mobile React Native Dev September 2018 - May 2020 1 yrs 8 mos

HCM CITY UNIVERSITY OF SCIENCE

HCM CITY UNIVERSITY OF SCIENCE

- Bachelor of Information Technology: Forming ideas, analyzing, designing, solving, and operating information technology problems.

- Degree classification: Good

- Graduation project: Glucare - The application to connect patients with doctors of Thong Nhat Hospital in HCM City.

+ Technologies:

- Client-side: React Native Application

- Server-side: Nodejs, MySQL

Diabetic patient monitoring and management project

We formed a team under the guidance of Dr. Vu Nguyen, who are working together to build an application using React Native to monitor and log the health status of users with diabetes. We build statistical charts, helping them have an overview of the progress of the disease and have more accurate conclusions for the next behavior.

Nodejs for Server, MySQL for database, and RN for Mobile Apps

MySQL Node.js React Native Next.js React

Team Leader July 2019 - April 2020 9 mos

PIKA TECH & ANALYSTICS

Bimos

Smart Bus Direction is a mobile application that helps users find the location of bus stations in the surrounding area.

- BackEnd with Flask using SQL Server and a little MySQL

- Mobile use Flutter as a cross-framework to build multi-platforms

Android, IOS, Firebase for RemoteConfig and FCM

Flutter Android iOS Development Firebase Flask MySQL SQL

Pika Lotus ERP

A package including scanning product code, inventory, quality control, and human resource management. The Server-side is signed in Python with Flask Framework, Client-side is the Flutter application. This is one of the rare ERP packages that work on mobile devices.

- BackEnd uses Flask with Python, the database uses SQLServer and some modules use MySQL

- Mobile use Android native with Java and high-level use Flutter to build multi-platforms

BackEnd, Mobile: Android, IOS

MySQL Python Flask ERP Inventory Android Flutter Java Android/Java

S4Life

A community of voluntary blood donors to timely send messages calling for donations. S4Life is a mobile application that provides information about volunteer blood donation schedules in Ho Chi Minh City.

Mobile: Android, IOS

Android Flutter iOS - Swift

Dai Hoi Ho Chi Minh City

An application for managing the congress programs used at the April 2020 conference in District 1, HCM City. Includes Party Committee management, attendance, document storage, and so on.

BackEnd: Flask, Node, Arduino FontEnd: Mobile App using Flutter, embed Android with java native code

Java Flask Android Node.js Flutter Android/Java Arduino

PLRac

an application with the original idea of connecting scrap buyers and sellers and modeling them on a map. Forming an environmental protection community.

Mobile: Android, IOS, Flutter

Android Flutter iOS Development

Internship June 2018 - December 2018 6 mos
